

PRESCRIPTION SAFETY EYEWEAR

Stylish, functional Prescription Safety Eyewear
to protect the vision of your most valuable assets

YOUR SAFETY RX SOLUTION

The protection you need; the style you want

Certified Prescription Safety Eyewear

Ensuring your employees' optimal performance and comfort at work requires prioritising their eyesight health. Workplace eye injuries often arise due to inadequate or inappropriate eye protection and a failure to observe occupational health and safety practices.

Current estimates are that about 40% of the workforce needs prescription eyewear. Nearly all industrial workplace requires eye protection. Outfitting your employees with certified safety eyewear that combines their need for clear vision and safety with a desire to wear them can be difficult. But Blackwoods have a solution to offer eyewear fashion-forward frame designs to increase worker acceptance while offering superior protection.

You can establish yourself as an employer of choice by taking proactive measures to safeguard your employees' eye health. Blackwoods, in conjunction with our preferred partners All Australian Safety and Bolle Safety offers a range of solutions to help you meet your legal obligations in a simple, affordable, and hassle-free way.

The Blackwoods Certified Prescription Safety Eyewear line is certified to meet MEDIUM impact standards as outlined in AS/NZS 1337.6:2012 and is available in various sizes and styles. Additionally, this range comes with a 2-year guarantee against any manufacturing defects.

Prescription Safety Eyewear Made Simple

Blackwood's partnership with All Australian Safety (AAS) and Bolle Safety simplifies the process when acquiring stylish, protective safety eyewear. Our prescription safety eyewear program provides an onsite solution for your employees or via Optician locations from our partner's nationwide network.

Our Collaboration Partners

all australian safety

LENS OPTIONS

Dynamic Phoenix Premium lenses are the latest in backsurface FreeForm Progressive design which offers best-in-class FreeForm technology and quality. This optimised lens offers peak performance due to its functional lens design and has wider viewing areas for both myopic and hyperopic patients.

Phoenix lenses offer superior strength but are lightweight and are completely resistance to most common chemicals and offers sharper and clearer vision at all distances. The Phoenix lens material is medium impact certified and offered across the All Australian Safety eyewear range.

Phoenix lenses offer superior strength but are lightweight and are completely resistance to most common chemicals and offers sharper and clearer vision at all distances. The Phoenix lens material is medium impact certified and offered across the All Australian Safety eyewear range.

BlueControl coating. Blue light in itself is a natural phenomenon. It is present in daylight, and it also helps us moderate our day and night sleep patterns. However, excessive amounts can have an adverse effect and cause dry eyes, blurry vision, headaches, eye strain and eye fatigue.

BlueControl multi-coat neutralises the blue light emitted by digital screens, protecting our eyes whilst offering more comfortable and relaxed vision.

Anti-Bacterial Coating. This coating reduces bacteria growth on your lenses by at least 99.9%* and is certified for its quality and effectiveness.* **It is included with our Bluecontrol coating as standard.**

*Based on BOKEN Quality Evaluation Institute's anti-bacterial activity value test results Staphylococcus aureus and E. coli) ** Tested according to ISO 22196 and certified by The Society of International Sustaining Growth for Antimicrobial Articles (SIAA) standards.

LENS EXTRAS & OPTIONS

 <p>B-ZEN BLUE BLOCKER ANTI-REFLECTIVE COATING</p>	 <p>PLATINUM THE ULTIMATE PROTECTION AGAINST FOG & SCRATCH</p>	<p>ANTI-REFLECTIVE MULTICOAT OPTION</p> <p>WATER REPELLENT, ANTI- STATIC AND REINFORCED ANTI-SCRATCH</p>
--	--	--

B-Zen Coating

ANTI-REFLECTIVE COATING AGAINST BLUE LIGHT, ANTI-STATIC WATER REPELLENT AND REINFORCED ANTI-SCRATCH.

The B-Zen coating was designed for people exposed to blue light through LED lighting and screens. This anti-reflective, water repellent, anti-static, anti-scratch coating filters about 20% of undesirable blue light. It is very scratch resistant and easy to clean. B-Zen's antistatic properties also improve clarity and reduce dust deposits on the lens surface, making it easier to clean.

Platinum Coating

ANTI-FOG AND ANTI-SCRATCH COATING.

Contrary to other anti-fog coatings, the Platinum® coating gives permanent fog resistance on both sides and limits the condensation effect. It maintains its properties even after repeated cleaning.

Anti-Reflective Coating

ANTI-REFLECTIVE COATING, WATER REPELLENT, ANTI-STATIC AND REINFORCED ANTI-SCRATCH.

Lenses without anti-reflective coating result in a reduction of light transmission of 10 to 15%, thereby penalising visual quality. Anti-reflective coated lenses are perfectly transparent and transmit 99% of light.

The anti-reflective coating improves clearness and contrast giving a more precise image. Anti-reflective coating also strengthens scratch resistance. Combined with an anti-static coating, it prevents dust from sticking to the lens and also has a water-repellent property to prevent water from staying on the lens.

LENS OPTIONS

LENS MATERIAL:	LIGHTNESS	OPTICAL QUALITY	RESISTANCE RATE TO:		
			SCRATCH	IMPACT	CHEMICAL
POLYCARBONATE	★★★	★★★	★★★	★★★	★★★
TRIVEX	★★★	★★★	★★★	★★★	★★★

Polycarbonate Lens Material

Thinner and lighter than plastic, polycarbonate (impact-resistant) lenses are shatter-proof and provide 100% UV protection.

Trivex Lens Material

Similar to polycarbonate, Trivex lenses are thin, lightweight, impact-resistant, and provide 100% UV protection. However, Trivex lenses offer sharper central and peripheral vision than polycarbonate lenses and are more resistant to chemicals.

FREQUENTLY ASKED QUESTIONS

ONSITE SERVICE

Q. Why should a company provide Safety Prescription Eyewear?

A. Employers have a duty of care under the OHS Act, to take responsible steps to ensure the health & safety of all employees.

Q. How important is a certified prescription safety eyewear product?

A. OHS demand certified products as the OHS Legislation states they must be manufactured to current Australian Standards.

Q. How do I know my prescription safety eyewear product is to Australian Standards?

A. Spectacles will be supplied with certified frame & lens markings and a Certificate.

Q. When will an Optician be onsite to perform fittings?

A. Blackwoods chosen partner will arrange with the OHS/Site Manager, to be onsite at the most suitable time for employees.

Q. Do you perform onsite Eye Testing?

A. We are unable to test onsite as bulk billing is not available.

Q. Do computer screens cause eye damage?

A. No, there is no evidence of computer screens causing eye damage, but with correct coating lenses can significantly Reduce glare.

Q. My current glasses fog, can this be stopped?

A. We have a unique non-alcohol Antifog material that works in a multitude of environments.

ONLINE SERVICE – ONLY FOR AAS

Q. Will I be able to use my own optometrist?

A. AAS has over 350 partner stores nationally who are able to provide a superior service for employees and more are being added to ensure adequate coverage.

Q. Does the Optometrist store have the Frames to try on?

A. The Optometrist stores listed in the Blackwoods Online Portal have the current safety frame range in store for employees to try on and select their ideal frame based on work duties, facial size and comfort.

Q. How much does it cost to perform an onsite fitting visit?

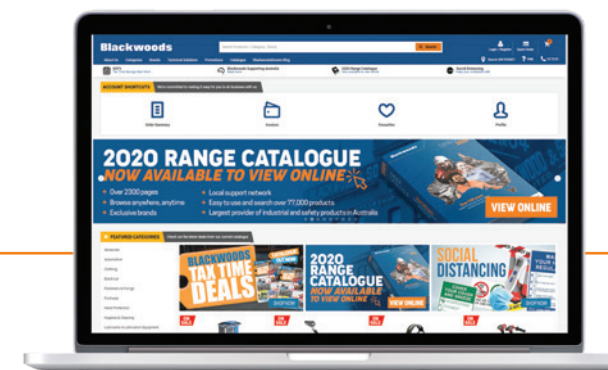

A. No charge for metro and a minimum of 8-10 people for regional areas for more than 3hrs return.

Q. Where do I collect my completed work glasses from?

A. The Optometrist store will ring the Employee when the completed spectacles are ready to collect from their store.

Q. How do I login to the online service portal?

A. Contact your Blackwoods representative who will arrange to get you a login through AAS.
